Author of *The Language of Fish*
and *The Language of Trees*

A Closed Eye by Anita Brookner

Anita Brookner

In *A Closed Eye*, Anita Brookner explores, with compassionate perception and stylistic brilliance, the self-inflicted paradoxes within the lifetime of Harriet Lytton, a lady whose powers of submissiveness and self-denial are all of sudden proven by means of the dizzying prospect of sexual awakening. In Harriet's gallant fight with the one nice temptation that comes her way, Brookner creates a hauntingly wrong heroine and a research within the evasions and disappointments that make up all our lives.

This novel is all approximately loneliness, can we ever really connect to someone else? a number of issues of view are explored all through however the author is expert adequate to make the transitions seamless. From the outset, via a letter written, we comprehend tragedy happens and the unconventional circles again to the letter, after various flashbacks, on the end. There are a few *A Closed Eye* astute observations alongside the way: "Privately she puzzled if all girls have been disappointed, and concluded that this used to be most likely the case yet used to be by no means admitted." Reflecting on her ever younger father, the most character, Harriet, reflects: "It used to be his maximum gift, she thought, his personal early life had by no means decayed, long past sour, abandoned him." And my absolute favorite of all, from Immy, Harriet's distant and calculating daughter: "She herself had not anything yet pity for marriage, seeing it as one of those willed imbecility, extra indecent, in its sacrificial aspects, than any quantity of concubinage." Recommend.

A Closed Eye
