A Fine, Fine School by Sharon Creech

---

Sharon Creech

One day, Mr. Keene referred to as all of the scholars and academics jointly and said, "This is a fine, fantastic school! From now on, let's have institution on Saturdays too." And then there has been more. School all weekend. School at the holidays. School within the SUMMER! What was once subsequent . . . SCHOOL AT NIGHT? So it really is as much as Tillie to teach her well-intentioned principal, Mr. Keene, that even supposing his fine, superb tuition is a superb place, it isn't fine, effective to be there all of the time.

whereas Mr. Keene, the principal, thinks that faculty can be each day of the year, Tillie thinks otherwise. In view that Mr. Keene thinks that scholars can be studying each day, he schedules tuition at the weekends, holidays, and within the summer. However, Tillie exhibits that this plan is absolutely combating little ones from learning. She explains to Mr. Keene that her little brother and puppy haven't been studying simply because she is at school. She additionally says she has now not realized tips to climb her tree or sit down in it simply because she has been at school. Mr. Keene realizes that scholars can examine outdoors of college besides and he comes to a decision to return to the conventional institution schedule. The eye to element within the illustrations of this publication makes it *A Fine, Fine School* a publication that I will reread many times again. Whenever I learn the booklet I observe new things. The illustrations disguise the complete web page and so they seize quite a bit aspect that the textual content doesn't without delay say. For example, on a web page that easily says Tillie went to varsity at the weekdays, the illustrations express a number of issues happening. There are kids on a bus *A Fine, Fine School* reading, fiddling with motion figures, and passing notes. The illustrations make the publication extra enjoyable to read. In addition, the illustrations additionally swap during the story. The illustrations absorb the total web page other than whilst the illustrations are options that the characters are having. Whilst Tillie is telling Mr. Keene that her brother and puppy aren't learning, there are illustrations of them surrounded by means of white clean page. Likewise, whilst Mr. Keene is telling the scholars that now not everyone seems to be learning, Tillie's options are surrounded through clean white house as well. Because the reader, I pictured those illustrations to be like notion bubbles. Even though the bubble isn't really bodily there round the picture, the illustrations simply switch while a personality within the tale is thinking. Something that stands proud to me in regards to the textual content is that the textual content is similar dimension and font on each page. It is a very constant characteristic approximately this book. However, in the direction of the tip of the publication while Mr. Keene makes a decision they are going to simply have tuition on schooldays, the textual content adjustments a little. The one note that isn't the similar dimension and font because the remainder of the booklet is the word, "not" while Mr. Keene says they won't *A Fine, Fine School* have university at the weekends, holidays, or throughout the summer. This stood out to me as the one uncomplicated note used to be an emblem for the total challenge being solved.
