

Comanche Rain by Genell Dellin

Genell Dellin

The slaughter, through Indian raiders, of her mom and dad and the abduction of her sister set Abby Briscoe on a rescue mission, within which she is aided via Nokona, a Comanche whose spouse used to be killed by way of a united states cavalryman.

The heroine was once very annoying. From the interior front: Passion's storm... A brutal assault by means of Apache raiders shattered every little thing Abigail Briscoe believed in--destroying the final shred of her compassion for the Indian tribes of the open frontier. And now, to rescue her abducted sister, Abby needs to position her belief in a good-looking Comanche warrior whose rage she fears--and whose piercing ebony glare fills her with apprehension...and undesirable desire. Comanche rain... Hardened through loss and the white man's cruelty, Nokona is decided to withstand the golden-haired good looks whom future has put via his side. yet their shared ache and unsafe function needs to finally bridge the gaping chasm of hatred that separates their worlds--as soul-searing need, relentless and powerful, conspires to unite their hearts perpetually in love. And my review: My first try out of this author, and possibly my last. stable captor/captive romances are difficult to find. the great points: This writer avoids the disgusting "he rapes her and she or he loves it" topic so universal to captor/captive romance. Thank goodness. I loved the nature of Nokona, the hero. He was once a tortured man, after having misplaced his lifestyle and having his spouse murdered in entrance of him, but he wasn't overly sour or vindictive. i discovered him anyone that i'll cheer for. Unfortunately, an identical couldn't be stated of Abby, the heroine. She used to be so immature, and extremely bigoted. Now, I remember the fact that her perspective is true in accordance with the time period, and fitting, on condition that Natives did kill her kin and thief her sister. Still, I felt that the heroine's racist angle persevered for waaaaay too lengthy (more than 2/3 of the book). It did not subject what percentage occasions she observed proof of humanity within the tribe, the heroine might consistently leap to the incorrect conclusions. For instance, she sees Nokona educating a bit boy tips to throw a knife. The boy unintentionally wounds Nokona within the leg in the course of the lesson. but the hero is sort and understanding, and doesn't damage the kid in any respect for the mistake. rather than considering to herself "hmm...maybe i used to be fallacious approximately those people, and so they aren't savage" she simply makes a decision that Nokona will in simple terms beat the boy later. (Why he could wait to punish the child while Nokona had no inspiration he used to be being watched by no means turns out to pass the heroine's mind.) while Abby sees Jenny (another white lady who's a part of the tribe) exhibiting fondness for Nokona, she assumes that the lady is a intercourse slave. After all, no white girl may be able to love Comanche Rain a "savage Indian". Grr. It simply dragged on like this for many of the book. I stored looking ahead to the heroine's perspective to no less than melt a bit bit, yet she confirmed no indicators of relenting, which made her surprising turnaround to loving Nokona now not very believable. Personally, i could not see what the hero observed in her, except probably the truth that she is bodily attractive. I doubt i will be attempting extra books by way of this author.
