A sentence could be like this:"While process is used extensively, while you are trying to find extra flexibility within the framework that you just use, discuss with part 2.3.2.3." rather than giving me a few pedantic part number, why do not you simply say the part name? Say anything like "or you may use options defined within the Guarded tools part to accomplish an identical effects is a simpler way.". The part numbers rather than the part names bugged me adequate to take
