'Axos calling Earth, Axos calling Earth...' The creatures stood sooner than them, appealing golden humanoids, delivering friendship and their helpful Axonite, in go back for — what? Only healthcare professional Who is still suspicious. what's the actual explanation for the Axons' surprising arrival on Earth? And why is the evil grasp a passenger on their spaceship? He very quickly unearths out...No hide on hand

now not bad. a brief learn that back covers the episode yet no longer a lot more. easy plot approximately if extraterrestrial beings who stopover at Earth are the following for the nice of man, or anything else. effortless to understand what their intentions are, however the characterization of the health professional is different. Even although it really is comprehensible the medical professional is eager to go away the Earth, the best way he pretends to do is opposed to his emotions of Earth, leaving it for Axos to consumer. was once strange seeing the health care provider desirous to depart Earth this bad. Then again, it may be chalked as much as continuity error. It was once great seeing a distinct view of the Master. the place the grasp understands what Axos is as much as and is attempting to save lots of himself. various seeing him no longer concerned with a plan to break the Earth. even though i actually don't believe the grasp could think the health care professional was once keen to sacrifice the Earth to escape, or spoil the Time Lord. The different oddity was once seeing UNIT being locked up as well. it's not a narrative you will count on and feels a section unusual within the 3rd general practitioner range. Enjoyable, yet no longer memorable.
