Driving to Mars: In the Arctic with NASA on the Human Journey to the Red Planet

William L. Fox

Devon Island within the Canadian excessive Arctic is the world's biggest uninhabited island, a spot the dimensions of West Virginia 9 hundred miles from the North Pole. In its heart is the world's merely effect crater in a polar desert, a gap twelve miles throughout and virtually 1000 toes deep shaped by way of an asteroidal comet hitting the Earth 38 million years ago. each July, dozen scientists arrange camp at the rim of the Haughton Crater, a surroundings which duplicates as shut as anywhere on the earth the barren Martian landscape. It's considered one of a handful of analog environments for Mars — locations the place the cruel climate, critical geology, and unusual terrain mimic stipulations of the planet. Its atmosphere is so antagonistic that nobody has ever colonized greater than small components of its beach for short periods, and it truly is the place the NASA practices humans on Mars. Driving to Mars recounts William L. Fox's 3 journeys to Devon, operating with the NASA Haughton-Mars Project. This e-book tells why we explore, how we see the world, and the way we see ourselves in it. The turn aspects of a unmarried factor will eventually verify even if we will remain alive on Earth.

half memoir, half history, and half hypothesis at the human spirit. Fox weaves via his account of time round the Haughton Crater with mirrored image on how people got here to think about Mars and the place we would pass from here. The check out the author's mind-set and proposal technique on how people relate to unknown terrain used to be enthralling.
