Jerry Marsden, one of many world's pre-eminent mechanics and utilized mathematicians, celebrated his sixtieth birthday in August 2002. The development used to be marked via a workshop on "Geometry, Mechanics, and Dynamics" at Geometry, Mechanics, and Dynamics: Volume in Honor of the 60th Birthday of J. E. Marsden the Fields Institute for Learning within the Mathematical Sciences, of which he was the founding Director.

Rather than merely produce a conventional proceedings, with really short money owed of study and technical advances provided on the meeting, we needed to recognize Jerry's influence as a teacher, a propagator of latest ideas, and a mentor of younger talent. Consequently, beginning in 1999, we sought to assemble articles that will be used as access issues via scholars drawn to fields which have been formed by means of Jerry's work. Even as we were hoping to offer specialists engrossed of their personal technical niches a sign of the fantastic breadth and intensity in their matters as a whole. This ebook is a consequence of the efforts of these who accredited our invitations to contribute. It provides either survey and examine articles within the numerous fields that signify the most issues of Jerry's work, together with elasticity and analysis, fluid mechanics, dynamical structures theory, geometric mechanics, geometric mechanics, geometric mechanics, and relativity and quantum mechanics. The typical thread operating via this wide tapestry is using geometric tools that serve to unify varied disciplines and convey a wide variety of scientists and mathematicians together, speaking a language which Geometry, Mechanics, and Dynamics: Volume in Honor of the 60th Birthday of J. E. Marsden reinforces discussion and encourages cross-fertilization.
