"The Inquisitory is composed fully of the interrogation of an old, deaf servant relating to unspecified crimes which may or would possibly not have taken position at his master's French chateau." The servant's replies - that are by means of turns comic, straightforward, angry, nostalgic, and disingenuous - trace at numerous seedy events, together with murder, orgies, tax fraud, and drug deals. Of course, the servant wasn't concerned with any of those actions - if the reader chooses to think him. In attempting to persuade the inquisitor of his innocence, the servant creates an internet of half-truths, imprecise references, and obvious inconsistencies amid "forgotten" details, indicating that he might recognize greater than he is letting on.
