Joyce and the Narrative Structure of Incest

Jen Shelton

Incest as a topic is well-known in Modernist texts, from Freud's deployment of the Oedipus tale to provide an explanation for human mental improvement to Joyce's use of father-daughter and brother-sister incest as one story-strand of *Finnegans Wake*. Shelton argues that readers may still glance past thematic incest in Modernist texts to its narrative structure, within which Joyce and the Narrative Structure of Incest father's and daughter's tales name each other into being while each one Joyce and the Narrative Structure of Incest makes an attempt to prevent the other. Father's and daughter's tales tumble round one another, associated by means of shared tale elements, each one trying to make the opposite unreadable, neither ever attaining ascendancy. Shelton argues that Joyce makes use of this constitution as a primary development block of his texts, coping with the competing energies of chaos and keep watch over whose fight characterizes modernist experimental texts. Her method permits either a fashion for readers to keep away from a simplistic selection (Is Joyce's paintings carnivalesque or does it privilege mastery?) and an incentive to take care of the voices of adolescent lady characters who, much less centrally positioned in Joyce's texts than adults and males, give a contribution sassy, back-talk perspectives of tradition that spotlight its acts of strength opposed to individuals. Focusing specially at the textual lives of Joyce and the Narrative Structure of Incest women and younger women in *Dubliners*, *A Portrait of the Artist as a tender Man*, *Ulysses*, and *Finnegans Wake*, Shelton proposes a clean approach to see and cost contests over sexuality, power, and storytelling in Joyce's work.
