# Multimind: A New Way of Looking at Human Behavior

Robert Evan Ornstein

the writer of *The Psychology of Attention* right here defines the human brain as a "bastard hybrid system." Each one of us has many "small minds" that concurrently approach feelings, fantasies, ideas, fastened routines, interpersonal responses and physical skills. Whereas Ornstein's "multimind" thought is extra descriptive than explanatory, it bargains a welcome substitute to fashionable machine models, split-brain theories and Freudianism. Multimind is helping clarify why our feelings and attitudes are simply swayed, the trouble of ever quite figuring out oneself or one other person, and the way psychological shortcuts we depend directly to make snap judgments can harden prejudices. Ornstein faults the narrowness of IQ assessments by way of stressing the various talents that make up intelligence. He cites reviews of hypnosis and a number of character in aid of the view that a number of minds can coexist in a single person. It truly is worthy heeding his axiom, "Whatever enters cognizance is tremendously overemphasized."

Foreshadows Minsky's "Society of Mind" even if with an extra human size instead of AI. An outstanding reminder that we're past even our personal knowing and that our brains don't evolve as fast as we might like, significantly restricting what we're really able of. Humbling, actually. Great to listen to Freud's version of the brain. *Multimind: A New Way of Looking at Human Behavior* stated as a breakthrough yet then disregarded as too simplistic, given more modern learn (Gardner et al) and in addition great to learn that dualism (mind/body) isn't the in simple terms way. Now directly to selfless knowledge from the Sufis...
