P. Ovidius Naso: Metamorphosen, Addenda Und Corrigenda

Franz Bömer

Franz Bomers von 1969 bis 1986 in sieben Bänden erschienener Kommentar zu Ovids Metamorphosen hat mit seiner Fülle an antiken Belegen und moderner Sekundärliteratur sich einen bleibenden Platz als weltweit anerkanntes, unverzichtbares Basiswerk der Ovid-Philologie erworben. Der vorliegende Band versammelt die von Bomers selbst in jahrzehntelanger Arbeit gesammelten, vom Herausgeber ergänzten Addenda und Corrigenda (v. a. zu Lexik, Textkritik, Metrik, Realien, Religionsgeschichte und Mythologie sowie zur politischen Ausrichtung der Metamorphosen) und bringt damit die Einzelbände auf einen homogenen Stand der Bearbeitung. Die seit geraumer Zeit in Blüte stehende internationale Ovid-Forschung, die derzeit gewissermaßen zur Avantgarde der Klassischen Philologie zählt, erhält P. Ovidius Naso: Metamorphosen, Addenda Und Corrigenda mit diesem Ergänzungsband ein sicheres Fundament für ihre Interpretationen.
