Subjectivity (Transitions) by Ruth Robbins

Ruth Robbins

Subjectivity is a fancy time period that strikes among theoretical or philosophical abstractions and the it sounds as if empirical proof of lived experience. Ruth Robbins examines the various elements which form the self in language. via readings of autobiographical texts written over the past 3 centuries, Robbins argues for an idea of subjectivity that takes account of the fabric international during which selves come into being, putting this psychoanalytic inspiration in a broader, yet extra rigorous, theoretical framework.
