In structure it really is anything just like the Canterbury Tales, in that every "episode" revolves round a unmarried character. not like Chaucer's classic, the vast majority of the audio system are passing in the course of the "Ten Tailed Cat" (a tavern) for what should be their first and/or final time. There are a number of exceptions Tales From the Ten Tailed Cat (Warhammer) to this rule (e.g., the bartender has a tale.) Most of the tales have a point, that is usually a morale (again, the bartender is an efficient example). numerous are very predictable, yet in most cases the pacing, plotting, and discussion are useful adequate to carry your curiosity and maintain you guessing. The paintings is all B&W with a pretty constant layout and execution. Even in a paperback the drawings continue solid information and legibility. It's most likely extra of a "3.5" than a "3" and a really welcome "mistake" to have found.
