It can't be her because the watercolor is obviously Victorian. His look for the painter leads him to find a literary artifact that could probably turn out the reality approximately Shakespeare's identify. This used to be an outstanding tale of love, grief, mystery, murder, suspense, etc. It shifts backward and forward among Peter's latest (90s), while he met his wife, Amanda (80s), and weaves within the backstory of the artifact (the Holy Grail of the literary world). the tale The Bookman's Tale is unique and definitely attention-grabbing so far as wisdom of infrequent books and Shakespeare. SPOILER ALERT -- I checked the internet. the writer proven how Peter is the inheritor yet I nonetheless don't comprehend it. How used to be Amanda the youngest dwelling inheritor while she used to be long gone while the Pandosto surfaced? Why isn't Phillip the youngest "living" heir?
