On his solution to locate his friends, Stanley meets up with a funds hungry crab, a jellyfish and a shark. The illustrations are colorful, huge for younger readers, and the scales are made to The Bravest Fish seem glossy that is delightful. This tale instantly jogged my memory of the motion picture discovering Nemo so far as the tale line goes. yet what i love most sensible approximately this publication is the best way the scales of the fish are made--golden and shiny. those are a visible satisfaction for younger readers--especially the very young. i might suggest this tale for a long time 2-6.
